

CONTENTS OF VOLUME 32

- ALLAN, A. B.—See King, R. O.
- BABBITT, J. D.—Osmotic pressure, semipermeable membranes, and the blistering of paint, 49.
- BANNARD, R. A. B.—A simple device to effect controlled portionwise addition of solid reactants to reaction mixtures under anhydrous conditions, 68.
- BARRY, T. W.—See Johnson, A. I.
- BAUER, T. W. and DORLAND, R. M.—Thermodynamics of the combustion of sodium-base pulping liquors, 91.
- BELL, J. M., GRAHAM, V. E., GIBSON, D. L., and LAWTON, W. C.—Increasing the food value of whey by yeast fermentation. IV. Feeding trials with mice, 55.
- BENNETT, W. D.—The microstructures of various grades of titanium and their rates of formation, 167.
- BHAT, G. N., LU, B. C. Y., and JOHNSON, A. I.—Distribution of short-chain fatty acids in water and carbon tetrachloride at 20°, 25°, and 30° C., 151.
- BUTLER, R. M.—See Plewes, A. C.
- CVETANOVIĆ, R. J. and PIELOU, D. P.—Preparation of standard films of crystalline *p*-*p'*-DDT for laboratory investigation by sublimation, 174.
- DORLAND, R. M.—See Bauer, T. W.
- EPSTEIN, N.—Graphical determination of maximum capacity of a washing filter press, 164.
- FURTER, W. F.—See Johnson, A. I.
- GIBSON, D. L.—See Bell, J. M.
- GIBSON, D. L. and RAITHBY, J. W.—Studies on improving the ease of reconstitution of skim milk powder, 60.
- GRACE, N. H.—See Zuckerman, A.
- GRAHAM, V. E.—See Bell, J. M.
- HUANG, CHEN-JUNG—See Johnson, A. I.
- JARDINE, D. A.—See Plewes, A. C.
- JOHNS, C. K.—Iodophors as sanitizing agents, 71.
- JOHNSON, A. I.—See Bhat, G. N.
- JOHNSON, A. I. and BARRY, T. W.—Device for determining conjugate phase compositions in three-component systems, 17.
- JOHNSON, A. I., FURTER, W. F., and BARRY, T. W.—A phase equilibrium study of the system *n*-octane - water - propionic acid, 179.
- JOHNSON, A. I. and HUANG, CHEN-JUNG—Graphical distillation calculations for binary mixtures of constant relative volatility, 187.
- JOHNSON, A. I., HUANG, CHEN-JUNG, and KWEI, TI-KANG—Note on the correlation of solubility data, 127.
- KING, R. O. and ALLAN, A. B.—The oxidation, decomposition, ignition, and detonation of fuel vapors and gases. XXII. The characteristics of the ignition and combustion of benzene in a carburetor engine as affected by heat load, 22. XXIV. The adverse effect on thermal efficiency of the endothermic cracking reaction required for the compression ignition of paraffin hydrocarbons, 220.
- KING, R. O., SANDLER, S., and STROM, R.—The oxidation, decomposition, ignition, and detonation of fuel vapors and gases. XXIII. The effect of flow configuration: *n*-Pentane and acetaldehyde in combustion tubes of various materials, 102.
- KINSEV, H. V.—See Rylski, O. Z.
- KWEI, TI-KANG—See Johnson, A. I.
- LAWTON, W. C.—See Bell, J. M.
- LEGER, E. G.—An instrument for leak detection and pressure measurement in high vacuum systems, 199.
- LENTZ, C. P.—Humidification of cold storages, 156.
- LU, B. C. Y.—See Bhat, G. N.
- MAKOW, D.—Frequency multiplication by regenerative modulation, 206.
- MATTHEWS, F. W. and WARREN, G. G.—A distillation method for the separation of impurities in commercial chlorine, 193.
- MISENER, A. D.—A portable electric velometer for low velocity liquids, 242.

- PIELOU, D. P.—See Cvetanović, R. J.
- PLEWES, A. C., JARDINE, D. A., and BUTLER, R. M.—The integral heats of vaporization of alcohol-water mixtures, 133.
- RAITHBY, J. W.—See Gibson, D. L.
- ROSE, D.—Estimation of protein denaturation in frozen milk, 78.
- ROSE, D. and TESSIER, H.—Effect of freezing rate on stability of frozen milk, 85.
- RYLSKI, O. Z. and KINSEY, H. V.—The influence of oxygen, nitrogen, and carbon on the mechanical properties and microstructure of titanium, 146.
- SANDLER, S.—See King, R. O.
- SIMS, R. P. A.—See Zuckerman, A.
- STROM, R.—See King, R. O.
- TESSIER, H.—See Rose, D.
- WAIT, J. R.—Radiation from a ground antenna, 1.
- WARREN, G. G.—See Matthews, F. W.
- WRIGHT, G. F.—Crystallization of milligram quantities of organic compounds, 250.
- ZUCKERMAN, A., SIMS, R. P. A., and GRACE, N. H.—Canadian erucic acid oils. IX. Thermal polymerization of rapeseed oil, 10.

CORRECTIONS

- Page 23. In line 1, paragraph 2, "experiment" should read "experiments".
- Page 34. At the end of the first line and beginning of the second, "Fig. 9" should read "Fig. 10".
- Page 35. In the caption of Fig. 12, under *c* and *d*, "3.0% weak" and "24.6% weak" should read "3.0% rich" and "24.6% rich", respectively.
